Ideation Phase
Empathize & Discover

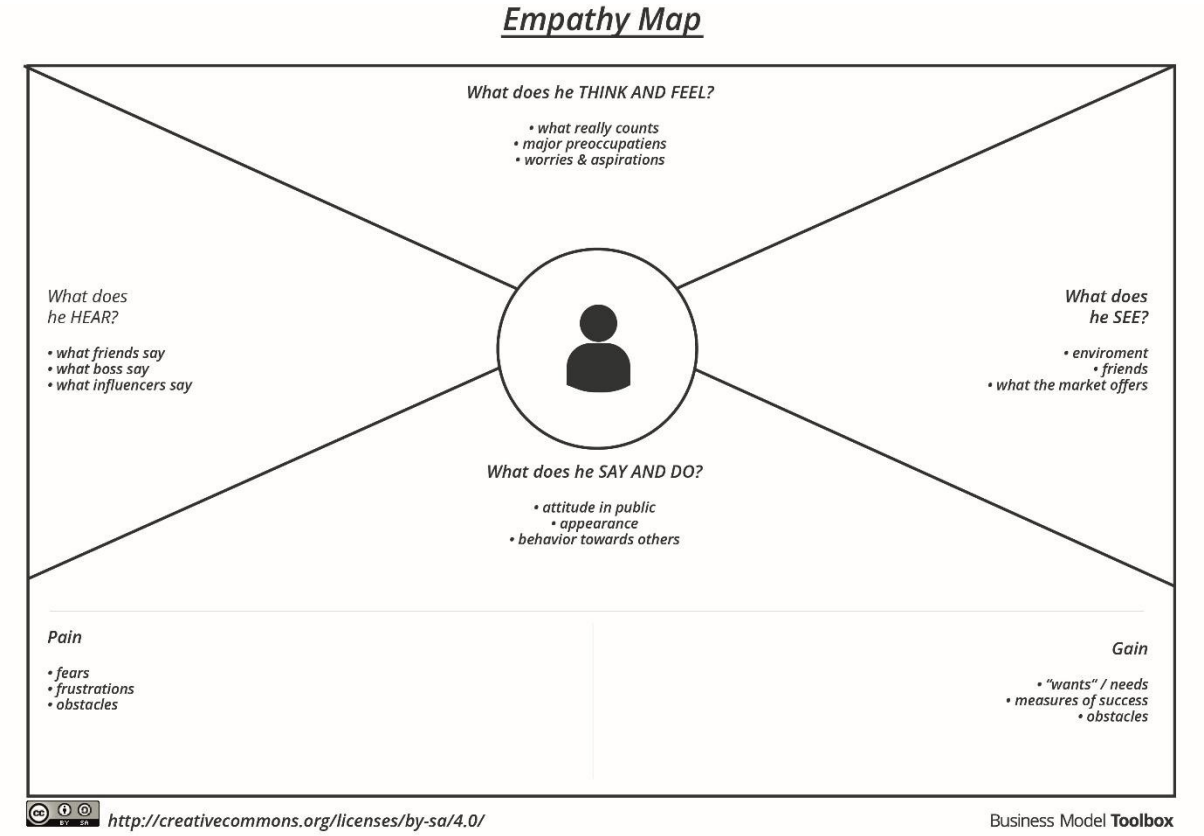

Date	30 September 2026
Team ID	SWTID-2026-2365
Project Name	AI FitTrack API – Fitness Tracking API with Google Gemini AI
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

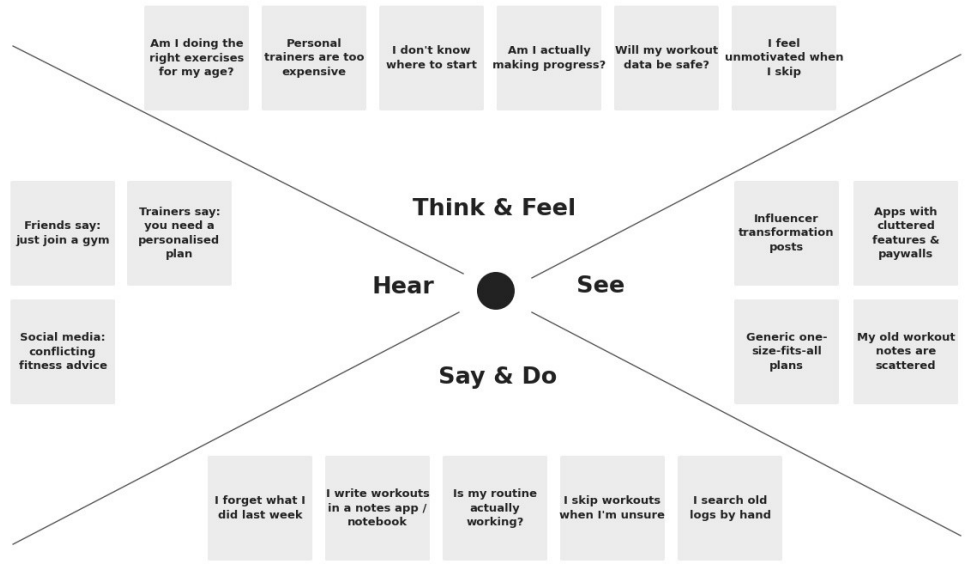

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map – AI FitTrack API (Persona: fitness beginner, age 18–35):

Persona: A fitness beginner who wants to lose weight or stay fit, has a limited budget and cannot afford a personal trainer.
Says & Does: Writes workouts in a notes app, forgets past sessions and skips workouts when unsure what to do.
Thinks & Feels: Worried about doing the wrong exercises, unmotivated and unsure whether progress is being made.
Hears & Sees: Conflicting advice on social media, costly trainers and generic plans that ignore age or experience.
Pains: No personalised guidance, scattered workout records and no insight into progress.
Gains: A personalised AI workout plan, one secure searchable workout log and motivating progress insights.
