Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A fitness beginner (age 18–35) who wants to lose weight	follow a safe workout plan that suits my age, goal and experience	the plans I find online are generic and a personal trainer is too expensive	fitness advice is one-size-fits-all and personalisation is costly	confused, unmotivated and likely to give up
PS-2	A regular gym-goer / working professional who logs workouts	record my workouts and understand whether I am improving	my records are scattered across notes and apps and are hard to search or interpret	there is no single, secure log with intelligent analysis of my numbers	frustrated and unsure about my progress
PS-3	A web / mobile app developer building a fitness product	add workout tracking and AI coaching to my app quickly	I must build login, database and AI integration from scratch	no ready, secure back end combines authentication, workout data and AI	pressured and slowed down
